HP DeskJet printers are known for their reliability and ease of use. However, like all wireless devices, they sometimes need to be reset when connecting to a new Wi-Fi network. Whether

you've changed your router, moved to a new location, or need to fix connection issues, resetting your HP DeskJet printer is a simple yet effective solution.

If you're not sure how to proceed or run into trouble during the process, you can always get help by calling **((US)+1)-888-385-2230 (US/OTA)** for expert HP printer support.

This comprehensive guide will walk you through every step to reset your HP DeskJet printer to a new Wi-Fi network, explain why resets are necessary, and provide troubleshooting tips.

1. Why You May Need to Reset Wi-Fi on Your HP DeskJet Printer

There are several reasons you might need to reset your printer's Wi-Fi settings:

- You've **changed your Wi-Fi router or password**.
- The printer is connected to the wrong network.
- You're **moving your printer to a new home or office**.
- The printer shows **“Offline” or “Not Connected”** errors.
- You want to **remove old network data** and start fresh.

By performing a Wi-Fi reset, you clear the previous connection details and allow your HP DeskJet to connect to your new Wi-Fi network.

If you experience connection failures or error codes, you can reach **((US)+1)-888-385-2230 (US/OTA)** for personalized help from an HP printer technician.

2. Before You Begin: Things You'll Need

Before starting the reset process, ensure the following:

- Your printer is **powered on** and in a ready state.

- You know your **new Wi-Fi network name (SSID)** and **password**.
- Your computer or mobile device is **connected to the same Wi-Fi network** you plan to connect your printer to.
- The HP Smart App is installed (available on Windows, macOS, Android, and iOS).

For setup assistance, HP's dedicated support is available at **((US)+1)-888-385-2230 (US/OTA)**.

3. How to Reset HP DeskJet Printer to New Wi-Fi (Step-by-Step Guide)

Method 1: Use the HP Smart App (Recommended)

1. **Open the HP Smart App** on your device.
2. Click the “+” sign to add a new printer.
3. Select your printer model (HP DeskJet 2600, 2700, 3700, etc.).
4. Choose **Wi-Fi Setup** or **Reset Wi-Fi Settings**.
5. Follow the on-screen instructions to reconnect to the new network.

If the printer isn't detected, press and hold the **Wireless** and **Cancel (X)** buttons together on your printer for 5 seconds to restore Wi-Fi setup mode.

Need remote assistance? Contact **((US)+1)-888-385-2230 (US/OTA)** for instant guidance.

Method 2: Manually Reset Wi-Fi Settings Using the Control Panel

For HP DeskJet printers with a display panel:

1. On the printer's screen, go to **Setup → Network Settings → Restore Network Defaults**.

2. Confirm the selection.
3. The printer will restart and erase old Wi-Fi settings.
4. Once restarted, use **Wireless Setup Wizard** to connect to the new Wi-Fi.

If the menu layout differs, HP experts at [\(\(US\)+1\)-888-385-2230 \(US/OTA\)](tel:18004853939) can help you locate the exact settings for your model.

Method 3: Reset Wi-Fi Using Button Combination (No Display Screen)

If your HP DeskJet printer doesn't have a touchscreen (like HP DeskJet 2600 or 2700 series):

1. Turn the printer on.
2. Press and hold the **Wireless** and **Cancel (X)** buttons together for **5 seconds**.
3. The **Power** and **Wireless** lights will flash, indicating reset mode.
4. Open the HP Smart App or your computer's Wi-Fi list.
5. Look for the printer's temporary network (e.g., *HP-Setup-PrinterName*).
6. Connect and reconfigure Wi-Fi through the app.

If the process fails, contact HP DeskJet support at [\(\(US\)+1\)-888-385-2230 \(US/OTA\)](tel:18004853939).

4. Reconnecting Your HP DeskJet to the New Wi-Fi

Once reset, follow these steps to reconnect your printer:

1. Make sure your printer is in **Wi-Fi Setup Mode** (lights blinking).
2. Open the **HP Smart App** or visit 123.hp.com/setup.
3. Follow the guided instructions to add your printer to the network.

4. Enter your new Wi-Fi credentials when prompted.
5. Wait until the **Wireless** light stops blinking—this confirms a successful connection.

If your printer doesn't connect after multiple attempts, HP's technicians at **((US)+1)-888-385-2230 (US/OTA)** can diagnose the issue remotely.

5. Alternative Method: WPS Push Button Connection

If your Wi-Fi router supports WPS (Wi-Fi Protected Setup):

1. On your printer, press and hold the **Wireless button** for 3–5 seconds until it blinks.
2. Press the **WPS button** on your router within 2 minutes.
3. The printer will automatically connect to the Wi-Fi network.

This is one of the quickest ways to reconnect HP DeskJet printers without needing to enter passwords.

If your WPS feature doesn't work, call **((US)+1)-888-385-2230 (US/OTA)** for alternative methods.

6. Resetting Wi-Fi Using the HP Embedded Web Server (EWS)

Advanced users can use the HP Embedded Web Server:

1. Print a **Network Configuration Page** from your printer.
2. Note the **IP address** listed.
3. Type the IP address into a web browser on a connected device.
4. Access **Network Settings** → **Restore Defaults**.

5. Re-enter your new Wi-Fi information under **Wireless Setup**.

If you cannot access the web page, the support team at **((US)+1)-888-385-2230 (US/OTA)** can help you locate the correct IP or settings.

7. Common Issues After Reset and How to Fix Them

Problem 1: Printer Still Not Found in HP Smart App

- Make sure the printer is in setup mode (Wi-Fi light blinking).
- Restart both the router and printer.
- Disable VPNs or firewalls temporarily.

Problem 2: Incorrect Password or SSID Error

- Double-check your Wi-Fi credentials.
- Use only the 2.4GHz band if your printer doesn't support 5GHz.

Problem 3: Printer Offline After Reset

- Remove and re-add the printer in HP Smart App.
 - Restart the computer and printer.
 - Contact **((US)+1)-888-385-2230 (US/OTA)** if the problem persists.
-

8. How to Reset Network Settings Without Affecting Other Data

If you only want to reset the Wi-Fi without losing other configurations:

1. From the printer menu, go to **Network Setup** → **Restore Network Defaults**.
2. Avoid selecting **Restore Factory Settings** — that will erase everything.

For confirmation, HP specialists at [\(\(US\)+1\)-888-385-2230 \(US/OTA\)](tel:18003852230) can guide you.

9. How to Reinstall HP Printer Drivers After Wi-Fi Reset

Sometimes, after reconnecting to new Wi-Fi, your computer may not recognize the printer.

Here's what to do:

1. Uninstall old drivers from **Control Panel** → **Devices and Printers**.
2. Visit 123.hp.com to download the latest HP DeskJet drivers.
3. Install and follow on-screen setup steps.
4. Add the printer again using **HP Smart App**.

If installation fails, you can call [\(\(US\)+1\)-888-385-2230 \(US/OTA\)](tel:18003852230) for driver setup help.

10. Tips for Maintaining Stable Wi-Fi Connectivity

To prevent recurring issues:

- Place your printer close to the Wi-Fi router.
- Avoid interference from microwaves or Bluetooth devices.
- Keep your printer's firmware updated.
- Use a static IP if your router frequently changes IP addresses.
- Restart your printer weekly to clear cache.

If you continue facing Wi-Fi dropouts, HP's technical support at **((US)+1)-888-385-2230 (US/OTA)** can recommend advanced solutions.

11. What Happens After You Reset Wi-Fi Settings

After resetting, your printer forgets all previous Wi-Fi networks and credentials. You'll need to reconnect using the HP Smart App or WPS method. Once reconnected, you can resume printing wirelessly from any connected device.

If you face repeated connection drops, **((US)+1)-888-385-2230 (US/OTA)** offers real-time help.

12. Factory Reset vs. Network Reset: What's the Difference?

- **Network Reset:** Only clears Wi-Fi settings.
- **Factory Reset:** Erases all custom preferences, including language, region, and ink status memory.

If you're unsure which reset is needed, HP professionals at **((US)+1)-888-385-2230 (US/OTA)** can advise you based on your model.

13. Resetting HP DeskJet Printer via Mobile Devices

For iPhone or Android users:

1. Download the **HP Smart App**.
2. Ensure your phone is connected to your new Wi-Fi.
3. Open the app → **Add Printer** → **Set Up a New Printer**.
4. Follow the guided reset and reconnect instructions.

Need assistance during setup? Contact [\(US\)+1-888-385-2230 \(US/OTA\)](tel://(US)+1-888-385-2230) for one-on-one guidance.

14. Why the Reset May Fail and How to Fix It

Causes:

- Weak Wi-Fi signal
- Outdated firmware
- Incorrect router settings
- Network interference

Fixes:

- Restart router and printer.
- Update printer firmware.
- Temporarily disable firewall.

Persistent issues can be resolved by HP support at [\(US\)+1-888-385-2230 \(US/OTA\)](tel://(US)+1-888-385-2230).

15. When to Contact HP Support

If any of the following apply:

- The printer refuses to enter Wi-Fi setup mode.
- HP Smart App can't detect your printer.
- The printer connects but can't print wirelessly.

- You've reset multiple times without success.

Call **((US)+1)-888-385-2230 (US/OTA)** to speak directly with HP support for advanced troubleshooting.

Conclusion

Resetting your HP DeskJet printer to a new Wi-Fi network is straightforward, whether you use the HP Smart App, WPS button, or manual control panel options. This process helps eliminate connection issues and ensures smooth printing performance on your updated network.

If at any point the reset fails or the printer refuses to connect, don't stress — professional HP printer technicians are available at **((US)+1)-888-385-2230 (US/OTA)** to assist you immediately.

Ten FAQs – How to Reset HP DeskJet Printer to a New Wi-Fi

1. Where is the reset button on my HP DeskJet printer?

Most models don't have a dedicated button. Use the **Wireless + Cancel (X)** buttons to trigger reset mode.

2. How long does a Wi-Fi reset take?

Usually between 30 seconds to 2 minutes, depending on the printer model.

3. Will resetting Wi-Fi delete my other printer settings?

No, only your network configurations will reset unless you do a full factory reset.

4. Why can't my HP DeskJet connect to the new Wi-Fi?

Your printer may still have old data stored. Perform a **Network Reset** and try again.

5. Can I reset Wi-Fi using my phone?

Yes, via the HP Smart App available on Android and iOS.

6. What if my printer doesn't show in HP Smart App?

Ensure it's in setup mode. If not, press the **Wireless** and **Cancel (X)** buttons together for 5 seconds.

7. Does my HP DeskJet work on 5GHz Wi-Fi?

No, most DeskJet models support only 2.4GHz networks.

8. My Wi-Fi reset keeps failing — what should I do?

Restart your router and call [\(US\)+1-888-385-2230](tel://(US)+1-888-385-2230) (US/OTA) for help.

9. How often should I reset Wi-Fi on my HP printer?

Only when changing routers, passwords, or locations.

10. Who do I contact for help resetting my HP DeskJet printer?

You can reach [\(US\)+1-888-385-2230](tel://(US)+1-888-385-2230) (US/OTA) for HP printer setup and Wi-Fi troubleshooting.
